

graphic fabric™ installation (horizontal graphic configuration)

- 1: The RasterPrint™ graphic attaches to the structure with Velcro®. Be sure that the hook Velcro® surfaces on the structure are all facing the front of the unit. There is no need to disassemble the unit if you find a piece facing the wrong direction- simply rotate the piece in place until the hook surface faces the front. Start the graphic installation in the top corner of the assembled unit.
- 2: Continue securing the graphic, working left to right, until the graphic is secured on all 4 sides and taut. Start installing the left counter skirt in the top inside corner. Work your way around the counter securing the skirt as you go and keeping the fabric taut.
- 3: Repeat process for the right counter skirt.
- 4: Lastly attach the lower fabric panel starting in the right corner as show and working left to right keeping the fabric taut and wrinkle free as you go.
