

rasterprint™ mats

dyed, not printed, for graphics that pop

RasterPrint Mats will communicate your message like no other floor covering. Unlike inkjet or dye-sub mats, our mats are dyed all the way through to the backing with the same dye used to dye commercial grade carpet. So blacks are black and colors are bold and vibrant. Photographic images will jump off the floor for many years to come with these commercial grade mats. RasterPrint Mats are rubber-backed so they won't slip on hard surfaces. The back also incorporates an exclusive "hooking" pattern that helps prevent slipping on carpet so they can be used in any trade show booth or commercial setting.

• Art Requirements

We need a HI-RES file that is at least 75 dpi at final size. We would like them to be TIFF, EPS or Photoshop. Please include the layered file for color corrections. We can also use vector files created in Adobe Illustrator.

NOTE: PMS and other color matches are not guaranteed due to the unique nature of the carpet dye process.

Use & Care: Designed for indoor use. Prolonged exposure to sunlight will result in image fading. Vacuum regularly. Wash in warm water with mild laundry detergent or with a wet extract carpet cleaner. DO NOT USE BLEACH.
